Doris its Ron Patafio, I read the piece, I don't intend to publish it, The Op-ed Page is not a forum for making accusations against people, factual accusations. In this case, because Hashmall is engaged in a case of current controversy also I don't see the relevance of bringing up the same case again that you've written about before, and it happened 12 years ago. So I will pass this along to our news department in case there is an interest on their part in looking further into it. Thanks.
